

YITP Course Creation Guide

Comprehensive Guide for Instructors

Welcome to the Youth Impact Training Programme (YITP) course creation system. This comprehensive guide will walk you through every aspect of creating engaging, effective courses on our platform.

Feature	Description
Rich Content Support	Text, videos, presentations, documents, and interactive elements
Assessment Tools	Quizzes, assignments, and automated grading
Progress Tracking	Detailed student progress and analytics
Certification	Automatic certificate generation upon completion
Gamification	Points, badges, and achievement system
Mobile Responsive	Optimized for all devices

Table of Contents

Section	Page

1. Getting Started

Course Creation Workflow

The YITP platform follows a structured workflow for course creation:

1. **Course Planning:** Define learning objectives, target audience, and course structure
2. **Content Development:** Create modules, lessons, and assessments
3. **Review Process:** Submit for admin review and approval
4. **Publication:** Course goes live for student enrollment
5. **Monitoring:** Track student progress and course effectiveness

Access Requirements

To create courses on the YITP platform, you need:

- Instructor account with appropriate permissions
- Access to the Django admin interface
- Understanding of your target audience and learning objectives
- Content materials (videos, documents, presentations)
- Assessment questions and rubrics

2. Course Structure Overview

Hierarchical Structure

YITP courses follow a three-level hierarchy:

Level	Description	Key Features
Course	Top-level container	Title, description, pricing, instructor assignment
Module	Organizational units	Grouping related lessons, unlock criteria, duration
Lesson	Individual learning units	Content, assessments, resources, objectives

Course Planning Template

Use this template to plan your course structure:

Course Title: _____ **Target Audience:** _____
Learning Objectives: 1. Students will be able to _____
 2. Students will understand _____ 3. _____
 Students will demonstrate _____ **Prerequisites:** _____
Estimated Duration: _____ hours **Module**
Structure: Module 1: _____ - Lesson 1.1:
 _____ - Lesson 1.2:
 _____ - Assessment:
 _____ Module 2:
 _____ - Lesson 2.1:
 _____ - Lesson 2.2:
 _____ - Assessment:

3. Content Creation Guidelines

Supported Content Types

The YITP platform supports various content types to create engaging learning experiences:

Content Type	Best Use Cases	Technical Notes
Rich Text	Explanations, instructions, theory	CKEditor5 with formatting, images, links
Video Content	Demonstrations, lectures, tutorials	YouTube/Vimeo integration recommended
Presentations	Slide-based content, visual aids	PowerPoint, PDF uploads (max 10MB)
Documents	Reading materials, handouts	PDF, Word documents (max 10MB)
Interactive Elements	Exercises, simulations	Embedded content, external tools
Images	Diagrams, infographics, photos	JPEG, PNG, GIF support
Audio	Podcasts, voice instructions	MP3, WAV, external platform integration

Content Creation Best Practices

- **Chunking:** Break content into digestible 5-15 minute segments
- **Multimedia Balance:** Combine text, visuals, and interactive elements
- **Clear Objectives:** State learning objectives at the beginning of each lesson
- **Progressive Disclosure:** Introduce concepts gradually, building on previous knowledge
- **Engagement:** Include questions, activities, and real-world examples
- **Accessibility:** Provide alt text for images, captions for videos
- **Mobile Optimization:** Ensure content works well on all device sizes
- **Resource Links:** Include additional resources for deeper learning

4. Assessment Design

Assessment Types Available

Type	Question Formats	Grading	Best Use
Quiz	Multiple choice, True/False, Short answer, Essay	Automatic Marking	Knowledge checks, comprehension
Assignment	Business plan, SWOT analysis, Case study, Reflection, Presentation, Project, Research paper	Manual Marking	Application, analysis, synthesis

Assessment Design Guidelines

- **Alignment:** Ensure assessments align with learning objectives
- **Variety:** Use different question types to assess different skills
- **Difficulty Progression:** Start with easier questions, increase complexity
- **Clear Instructions:** Provide clear, unambiguous instructions
- **Feedback:** Include explanations for correct answers
- **Time Limits:** Set reasonable time limits for quizzes
- **Multiple Attempts:** Allow retakes for learning-focused assessments
- **Passing Scores:** Set appropriate passing thresholds (typically 70%)

5. Technical Implementation

Step-by-Step Course Creation

Step 1: Create Course

Navigate to Django Admin → Courses → Add Course
Fill in title, description, learning objectives, prerequisites

Step 2: Add Modules

Create organizational modules with clear titles and descriptions
Set sort order for proper sequencing

Step 3: Create Lessons

Add individual lessons to each module
Choose appropriate content type and add content

Step 4: Add Assessments

Create quizzes and assignments for each lesson
Configure grading and attempt settings

Step 5: Review and Test

Preview content, test assessments, check progression
Ensure all links and media work correctly

Step 6: Submit for Review

Change status to 'in_review' for admin approval
Address any feedback from reviewers

6. Quality Assurance Checklist

- Course title is clear and descriptive
- Learning objectives are specific and measurable
- Prerequisites are clearly stated
- Content is organized logically in modules and lessons
- Each lesson has clear learning objectives
- Content is engaging and interactive
- All media files work correctly
- External links are functional
- Assessments align with learning objectives
- Quiz questions are clear and unambiguous
- Correct answers are accurate
- Passing scores are appropriate
- Content is accessible and mobile-friendly
- Estimated durations are realistic
- Course flows logically from basic to advanced concepts
- All content is original or properly attributed
- Grammar and spelling are correct
- Course is ready for student enrollment

7. Support and Resources

Getting Help

If you need assistance with course creation:

- **Technical Support:** Contact the YITP technical team for platform issues
- **Instructional Design:** Consult with educational specialists for course design
- **Content Review:** Submit courses for peer review before publication
- **Student Feedback:** Monitor course analytics and student feedback for improvements

Additional Resources

- YITP Platform Documentation: Complete technical documentation
- Video Tutorials: Step-by-step video guides for course creation
- Best Practices Library: Examples of excellent courses
- Community Forum: Connect with other instructors
- Regular Training Sessions: Live training and Q&A; sessions
